

Mesh Container

Catalog no. KS.3

Product features

Panel construction enables easy transport of the container parts.

Very easy to assemble.

There is a possibility of piling containers up to max. 3 levels.

Closing panel guarantees partly opening that facilitates the loading.

Equipped with beam that limits possibility of front mesh opening.

Strengthening of the container panels prevents meshes deformations.

Container is adjusted to forklift transportation.

Material

square or rectangular steel profiles,
1.5-6.0 mm thick steel sheet metal,
steel pipes, steel bars,
galvanized fasteners.

The container intended for storage and for transportation of used clothes and other valuable goods.

Transport

Reduce transport costs – containers can be delivered disassembled.

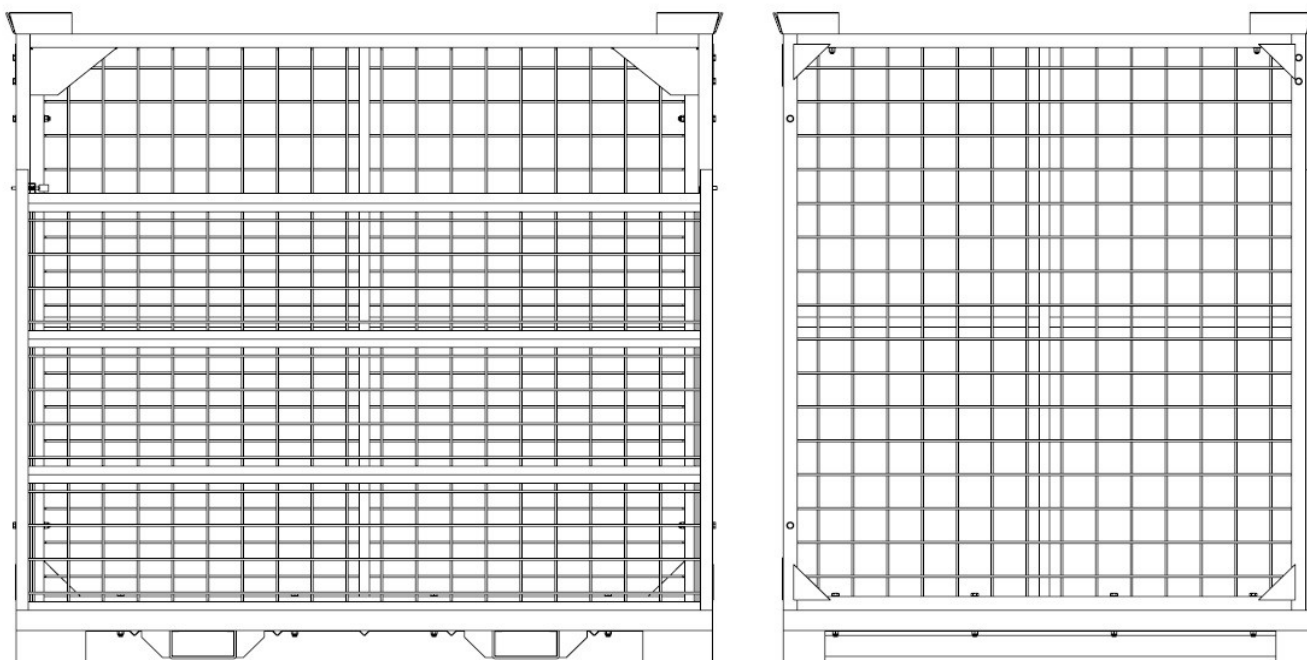

In a semitrailer: 80 containers (in parts).

Anti-corrosion protection

- powder coating.

Mesh Container
